UniGen[®] HR

Extremely quiet due to unique flexible drive system

Super High-Speed Centrifuge

Refrigerated - 30,000 rpm / 70,434 x g

➤ High-Speed Centrifuge with Flexible Axis!

- This provides the best **smooth running**.
- The separation of the own centering of the motor and the centering of the installed rotor protects the bearing of the entire drive system.
- Thus, your centrifuge will be maintenance free for a very long time.

Herolab, founded in 1979, is a manufacturer of laboratory equipment and specialized in the production of centrifuges and rotors.

The production of a wide range of adapters as well as tubes and bottles complete the program and fits not only into our rotors but also in rotors from other manufacturers.

As the most important European manufacturer of these accessories for **High-Speed** as well for **Ultra-Centrifuges** these products are made from high-quality plastics for the volume range from 2 ml to 1000 ml and are reusable for frequent application.

Almost all the tubes and bottles can often be autoclaved frequently and are therefore reusable for a longer period of time.
